Professional Summary

Quality Assurance Engineer with 5 years of experience in manual testing and quality assurance processes within Agile environments. Skilled in test planning, execution, and defect lifecycle management across web and mobile platforms. Proficient in tools like JIRA, TestRail, and Postman for tracking, documentation, and API testing. Strong background in requirement analysis, test case design, and collaborating with cross-functional teams to ensure timely and high-quality software releases. Known for identifying critical issues early in the development cycle, improving test coverage, and contributing to continuous process improvements.

Work Experience

Senior SQA Engineer   **Jan 2025 – Present**
DEV-Vault — Devsinc

- Led and performed sanity, smoke, integration, regression, and shipment assurance testing, ensuring high software quality and stability.

- Worked closely with developers, business analysts, and project managers to align testing efforts with project goals.

- Hands-on involvement in fault reporting, root cause analysis, follow-ups, and verification, ensuring timely resolution of defects.

- Designed, developed, and executed test cases to validate system functionality and ensure quality assurance.

Senior SQA Engineer   **Apr 2019 – Dec 2024**
Intellirent — Devsinc

- Led the QA team to design and implement comprehensive QA strategies, covering functional, regression, performance, and security testing.

- Conducted root cause analysis and risk assessments, identifying potential defects early and implementing preventive measures to improve software stability.

- Collaborated with product managers, developers, and stakeholders to resolve defects, ensuring seamless system integration and improving product quality.

- I conducted scrum ceremonies and participated in Agile planning, backlog grooming, acceptance criteria definition, sprint reviews, and retrospectives.

- Conducted cross-browser and cross-platform testing for web and mobile applications to enhance compatibility across different environments.

- Led and performed sanity, smoke, functional, system, integration, regression, and shipment assurance testing, ensuring high software quality and stability.

- Defined Test Strategies, prepared Test Design, Test Scenarios, Test Cases, and Peer Reviews, ensuring comprehensive validation.

Projects

Intellirent (myintellirent.com)
Streamlines rental marketing and tenant screening to reduce vacancy rates and centralize application activity.

MapleHR (maplehr.io)
HR platform that centralizes data, automates workflows, and enhances operational efficiency.

BioMark (biomarking.com)
Medical data interpretation platform that delivers predictive, personalized, and preventive care.

Skills

- Manual Testing
- Functional & Non-Functional Testing
- Performance & Exploratory Testing
- Adhoc Testing
- Agile/Scrum
- SDLC/STLC

- Bug Life Cycle
- Jira, Asana, Trello
- Pivotal Tracker
- TestRail, Kualitee
- Confluence, Notion

Education

MS in Computer Science
